

FORTIGUARD™ SUBSCRIPTION SERVICES

- **Antivirus**
- **Intrusion Detection & Prevention**
- **Web Filtering**
- **Antispam**

Need for Proactive Protection

As security threats evolve and become more sophisticated, traditional security technologies are simply not working. To protect against blended attacks, viruses, worms, Trojans, spyware, Phishing and other harmful traffic, Fortinet developed the FortiGate Unified Threat Management security platforms with the latest cutting edge technology to proactively identify and stop new generation threats.

Combined with Fortinet's FortiGuard Antivirus, Intrusion Detection & Prevention, Web Filtering and Antispam automated security subscription services, keeping up-to-date with the latest security threats have never been easier. FortiGuard security services are created, updated and managed by a global team of Fortinet security professionals that are working around the clock seven days a week to ensure that the latest attacks are detected and blocked before they can harm your corporate resources or infect your end-user computing devices.

The Fortinet Commitment - Setting a Higher Standard

Each FortiGuard security service is created with the latest security technology and designed to operate with the lowest possible operational costs with per-box licensing fees to offer unparalleled value. With Fortinet Security Services enabled, customers can rest assured that their FortiGate security platforms are performing optimally and protecting their corporate assets with the latest security technology at the best possible price.

Features:

- 4 unique subscription services
- Comprehensive Security Offerings
- Industrial strength security functions
- Continually updated against threats
- Simple, low cost per-box licensing
- Global service and Support Infrastructure
- Industry Leading "Low total cost of ownership"
- 360° Protection & Visibility

FortiGuard Antivirus Service

Having the latest virus detection signatures and heuristic engines is critical to stopping the latest breed of blended threats, viruses, worms, Trojans and other harmful malicious code. Fortinet's FortiGuard Antivirus provides fully automated protection for FortiGate Antivirus Firewalls and keeps them fully up-to-date with the latest antivirus defenses against network-based threats. With 10 global locations, access to critical updates is guaranteed fast and reliable.

Features & Benefits

Automated Updates

Keeps defenses up-to-date with the latest virus, spyware, and heuristic detection engines.

Proactive Threat Library

Complete protection against all Wild List threats and thousands of popular operating system and application vulnerabilities.

Simple Setup

Fast implementation with no ongoing overhead for true "set and forget" functionality.

Two-Way Updates

Both **Push** and **Pull** updates provide the fastest possible update times.

Chassis Licensing

Significantly lowers entry cost and ongoing maintenance costs year over year.

FortiGuard Intrusion Detection & Prevention Service

Network attacks and threats originate from many sources and having just antivirus protection is no longer adequate in protecting mission critical networks. Fortinet's FortiGuard Intrusion Detection & Prevention (IDP) arms FortiGate customers with the latest defenses against stealthy malicious and suspicious network activity. Fortinet security specialists work with worldwide organizations around the clock to isolate the latest application and OS vulnerabilities – creating the latest detection and prevention technologies to keep customers one step ahead of the attackers.

Features & Benefits

Automated Updates

Keeps intrusion detection and prevention defenses up-to-date with the latest attack signatures and detection engines.

Comprehensive IDP Library

Over 1400 signatures and the latest anomaly inspection, deep packet inspection, full content inspection, and activity inspection engines proactively updated on a daily bases.

Flexible Policies

Full control of all attack detection methods to suite the most demanding security applications.

Two-Way Updates

Both **Push** and **Pull** methods are supported to provide the fastest possible update times.

Chassis Licensing

Significantly lowers entry cost and ongoing maintenance costs year over year.

FortiGuard Web Filtering Service

Surfing the internet has become a critical part of conducting business and often a requirement for government and educational institutions, however inappropriate Internet usage has led to lower productivity, inappropriate use of company resources, harassment, legal liability, and human resource issues. Fortinet's FortiGuard Web Filtering Service regulate and provide valuable insight into all web activities allowing customers to meet new **Government Regulations, Educational Compliance, HR Policies and Corporate Internet Usage Policies**. With 56 web content categories, over 25 million rated domains, more than 2 billion web pages, FortiGuard Web Filtering Service is the one of the industry's most accurate integrated web filtering services.

Features & Benefits

Granular Blocking & Filtering

Provides fast and easy way to select Web categories to allow, log, or block.

Comprehensive URL Database

High accuracy and with greater rate of effectiveness over competitors.

Chassis Licensing

Low implementation cost with no per-user operational costs means significant cost savings.

FortiGate Integration

Absolutely no additional hardware or software required.

Easy Setup

Get up and running in minutes with minimal ongoing operational support.

FortiGuard Antispam Service

The volume of spam email is increasing globally year over year and spam email is becoming the majority of all email received. Fortinet's FortiGuard Antispam Service is designed to significantly eliminate the amount of "obvious spam" before it affects network resources. Using the latest *dual pass* detection methods, spam detection capabilities are greatly enhanced over standard RBL and other content based detection methods. With a collection of global spam probes, Fortinet security professionals develop and maintain accurate lists of spammers and spam content that contain millions of spam detection entries. FortiGuard Antispam quickly eliminates spam to reduce the workload on corporate email servers, decreases time employees spend sorting spam, and reduces harmful email messages from entering the corporate network.

Features & Benefits

- Dual Pass Detection Technology** Significantly reduces the volume of spam email at the perimeter before it enters the corporate network, significantly reducing email attacks, infections and the number of irritating email.
- Customizable Policies** Extreme flexibility with ability to set antispam filtering policies for each interface, department, or group of users.
- Chassis Licensing** No per-user licensing costs results in significantly lower operational and capital cost when compared to other similar RBL type services.
- Simple Setup** FortiGuard Antispam simplifies the task of implementing antispam technology with just a few clicks of your mouse.
- Flexible Deployment** Can be enabled on FortiGate and FortiMail systems.

FortiGuard Security Service Matrix

FortiGuard Security Service	FortiGate Antivirus Firewall Platform	FortiMail Secure Messaging Platform
FortiGuard Antivirus	*	*
FortiGuard Intrusion Detection & Prevention	*	N/A
FortiGuard Web Filtering	*	N/A
FortiGuard Antispam	*	*

* = Supported, N/A = Not Available
